## ADDITIONAL INFORMATION

### COURSE PROJECT

S.O.A. (Smart Outfit Assistant) on Android

Smart Outfit Assistant is an android app that would assist people in choosing your outfit for a specific day or event. At its core, SOA contains a database of all the clothes divided into several categories. Each piece will contain a large set of attributes to help the app and the user pick just the right outfit for the day.

Floating-point multiplier

In this personal senior design project, a simple floating-point multiplier has been built that accepts as operands two 12-bit, possibly unnormalized floating-point numbers, and that output a 12-bit normalized number and an overflow indicator

## FOREIGN LANGUAGE SKILLS

Speak, read and write Chinese
